

rectum. I don't see how that would fit then a person would need some kind of medical treatment. And I was denied going to the clinic.

Can you also ask the warden why I was denied to go to the clinic and get medical treatment after this alleged incident, why I was denied to call the prea hotline and why am I being retaliated against?

Will you please post this in any way that you want to without putting my full name online and send something to the warden where you can include my name about this whole incident, my name needs to be included so the warden will know what to look into. This is corrupt and wrong and something should be done. Thank you very much for your help and time. Also please do not forget to say something about the protective custody situation. The things you do are greatly appreciated, I hope to hear back from you very, very soon.

Sincerely,

Billy Lopez Jr
