

“Hammer” Hoaxer Infiltrates Lindell’s “Absolute Proof,” Part 1

“IT ALL ORIGINATES WITH MONTGOMERY”

by Sharon Rondeau

[MyPillow Founder & CEO Mike Lindell (Wikimedia Commons, [Gage Skidmore](#))]

(Feb. 11, 2021) – *[Editor’s Note: The following represents several weeks’ worth of round-the-clock intensive research, collaboration and verification of the evolution of the “Hammer/Scorecard” narrative which has preoccupied an untold number of Americans since the November 3, 2020 presidential election wherein what appeared to be an easy victory for incumbent Donald J. Trump was transformed overnight into a reversal in every “swing” state in favor of Democratic candidate Joe Biden, who now occupies the Oval Office.*

Arising from the confusion of the election aftermath were writers Mary Fanning and Alan Jones, who purported to know how the “steal” from Trump was effected. As this publication has

reported over a number of years, the “Hammer/Scorecard” narrative is yet another iteration of a tale emerging more than seven years ago, with different claims, by Dennis L. Montgomery, a self-described software designer whose relationship with the U.S. intelligence community cost American taxpayers millions but reportedly yielded nothing except unsubstantiated claims.

All of the evidence presented here is gleaned from publicly-available documentation.]

In November 2013, at the direction of former Maricopa County, AZ Sheriff Joseph Arpaio, two [investigators](#), Michael Zullo and Det. Brian Mackiewicz, were dispatched to Seattle, WA to interview former government subcontractor Dennis L. Montgomery pursuant to his allegations of illegal U.S. government surveillance of residents of Arizona and the nation using a secret super-computer of his design and creation he dubbed “The Hammer.” The initial interview, which eventually extended to Arpaio, would launch a yearlong investigation that ultimately showed Montgomery to have produced [none](#) of the evidence he purported to have and defrauded the Maricopa County Sheriff’s Office of \$120,000.

Dennis Montgomery rose to notoriety as the former CIA subcontractor deemed “[The Man Who Conned the Pentagon](#)” and has now thrust himself into the presidential election circus through the efforts of Mary Fanning and Alan Jones at [The American Report](#).

Montgomery’s infamous past has been the subject of many [articles](#) at The Post & Email. However, Fanning and Jones have deliberately failed to disclose any of Montgomery’s dubious past dealings to their readers, including findings by two federal judges, respectively, of “[perjury](#)” and “[fraud](#).” In one breathtaking example, Fanning and Jones neglected to inform their audience of Montgomery’s six-count felony indictment from Clark County, NV for allegedly passing a check with insufficient funds in the amount of [\\$1.8 million](#) in a Las Vegas casino, a case which remains open after more than a dozen years.

Despite caution having been advised to Fanning and Jones years ago, Montgomery, who has a lengthy, well-documented history of fraudulent and unsubstantiated claims, appears to have mesmerized the two “investigative journalists” with fantastical stories of his time working sporadically as a subcontractor for the CIA dating back over two decades.

Montgomery has claimed for nearly four years, through Fanning and Jones, to have “[built](#)” The Hammer. More recently, Montgomery added an alleged vote-altering software, “[Scorecard](#),” to his narrative as to how the 2020 presidential election outcome was allegedly changed from Trump to Biden but has provided no proof to support any of his claims.

Worked his way into documentary

Since [March 17, 2017](#), Fanning and Jones have identified Montgomery as their sole source of information on “The Hammer,” including during their appearances on Dave Janda’s “[Operation Freedom](#)” and, more recently, Brannon Howse’s [WVW-TV](#) shows.

Fanning colleagues Lt. Gen. Thomas McInerney (Ret) and former NSA program developer J. Kirk Wiebe accordingly [hailed](#) Montgomery as “a world-class American statesman” and “an

[American hero](#),” respectively, and Howse established a [page](#) on his website opining that all Americans should hold Montgomery in the highest regard.

Fanning’s strategy changed, however, when on January 3, 2021, she [reported](#) in an article and on [January 13](#) claimed to Howse to have in her possession evidence of foreign interference which allegedly changed the outcome of the U.S. presidential election. To Howse’s audience, she noticeably omitted any reference to The Hammer, Scorecard, or Dennis Montgomery. At that point, Fanning referenced only an unnamed “source” of the evidence and an unidentified “whistleblower” who allegedly brought evidence of [election-tampering](#) to then-FBI Director James Comey in 2015. While the individual can be none other than Montgomery based on Fanning’s own reporting over the years, to those not having followed the story, that detail would not have been evident.

Fanning’s new claim was incorporated into Lindell’s “documentary” on alleged election fraud, “[Absolute Proof](#),” released last Friday, on which Lindell appeared to rely as not only credible evidence of vote-tampering, but also hand-down proof of same.

As has been noted by at least one [software expert](#), the information is inconsistent with established facts and is therefore highly questionable.

The “cybersecurity analysts” Fanning invoked to Howse remain unidentified and unvetted.

The Post & Email can now report that in a devastating 2013 audio recording, Fanning and Jones’s star witness, the self-professed inventor of a government supercomputer named “The Hammer,” can be heard remarkably telling Maricopa County Sheriff’s Office investigators that he actually **never invented, built or was consulted in the creation of the alleged CIA spying computer, “The Hammer”!**

The newly-released recordings of voluntary statements Montgomery gave to MCSO investigators contains the astonishing revelation that he in fact did not create or invent “The Hammer” and stands in direct contradiction to his reported claims made to Fanning and Jones over the last nearly-four years, calling into question the validity and credibility of Fanning and Jones’s only uncorroborated source.

Zullo told The P&E that during interviews with the MCSO alleging illegal government surveillance, Montgomery never mentioned vote-altering software, “Scorecard” nor having played a part in creating any such product. “Neither did he tell this tale to Federal Judge Royce Lamberth in 2014,” Zullo said, referring to a 2014 interview Zullo arranged so that Montgomery’s information could be evaluated by a federal authority.

1. Montgomery: “Ft. Washington...a very secretive place...you’re guarded at the gates...”

[\[Recording 1\]](#)

2. Montgomery: “So, basically, I did not see The Hammer yet; I didn’t know anything about it...”

[\[Recording 2\]](#)

3. Montgomery: “They had already purchased it...”

Mackiewicz: “Did they consult you?”

Montgomery: “No, because they knew...”

[\[Recording 3\]](#)

“The recording of Montgomery’s voluntary 2013 interview absolutely devastates the foundation of Fanning’s already challenged body of work and calls into question the validity and credibility of her only uncorroborated source, Dennis Montgomery,” Zullo said. “This is just one example of a long list of Montgomery’s inconsistent statements, manufactured claims and continued embellishments of his ever-morphing narrative.”

Zullo told The P&E that this was not the only time Montgomery had represented to them that he did not build or have anything to do with the procurement of the government supercomputer which Montgomery described as Top Secret. And this was not the only time investigators would find Montgomery’s “glaring contradictions, embellishments and outright lies,” Zullo said. Zullo stated that Montgomery made similar admissions in his formal interview with the Arizona Attorney General’s Office in December 2013, a transcript of which The Post & Email has sought through a public-records request. Zullo said that Montgomery would later change his story from his original interview and credit himself with building The Hammer, albeit without any proof.

During the “free talk” that same year with Zullo and Mackiewicz and attorneys from the Arizona Attorney General’s Office, Montgomery described The Hammer as capable of accessing hundreds of proxy servers throughout the world and surreptitiously retrieving information without detection and in encrypted fashion. Montgomery claimed to have “invented” the software programs responsible to accomplish this highly sophisticated task. He also claimed the ability to retrieve the packet internet information traveling over internet highways, store it and later reconstruct the information from stored drives in order to put the gathered intelligence in a readable fashion. Montgomery called this process “Packet Reconstruction,” Zullo said, and claimed to have all types of information stored on 425 one-terabyte hard drives and to have liberated it from The Hammer’s purported location in Ft. Washington, Maryland.

However, the exact programs and operations described by Montgomery were actually disclosed by Edward Snowden some months before Montgomery decided to emerge as a “whistleblower” and divulge his purported secrets.

“The NSA already had and was utilizing a number of clandestine surveillance tools similar to those Montgomery described, and they were now public knowledge,” Zullo told The Post & Email. “Snowden’s revelations came months before Montgomery surfaced. The government software programs such as Narus, Verint, Xkeyscore, ThinTread and Trailblazer were already operational and had been for a number of years and not of Montgomery’s creation. All of them did exactly what Montgomery described to investigators and claimed his ‘invention’ could do. There is a very strong possibility Montgomery pored over the Snowden documents and created his spy story out of whole cloth. It all sounds good, but he just can’t prove any of it. What was

becoming apparent to us in our dealings with him was he was always coming up with information after the fact. If it was in the news, out of the blue he had some type of information about it; he was always late to the party.”

Zullo said that Montgomery in 2013 made no claim of “Scorecard” or having any knowledge of vote-altering software in either his free talk or his testimony before Lamberth, at which Zullo was present. It was a question that Zullo himself point-blank asked Montgomery, with Montgomery’s response being he had no knowledge of any vote count-altering capability. This is well-documented and preserved on video and was turned over in federal court.

Zullo has also told The P&E that Montgomery’s claim of being at Ft. Washington has not been corroborated on any level. “Montgomery would have you believe he was working at Ft. Washington from early 2009 to late 2010, but documentation reveals that the Blxware contract where Montgomery was purportedly dispatched to Ft. Washington as a subcontractor was short-lived,” Zullo said. Signed in January 2009 and remaining in effect only until March of 2009, the Air Force [terminated](#) the contract because the software “failed to meet its expectations.”

“Montgomery wanted investigators to believe that he actually stole 425 hard drives containing evidence of illegal government surveillance over a short period of time, by his own description, from an ultra-secure government facility, without getting caught,” Zullo said. “Think about this: he wants you to believe he stuck 425 hard drives down his pants and just walked out of a super-secret secure facility that by his description rivals that of a James Bond movie.”

“Fanning has been feverishly trying to find anyone of credibility to validate Montgomery and his Hammer/Scorecard claims,” Zullo added. “Unsuccessful in her quest, she points to the [Declaration](#) of Dr. Navid Keshavarz-Nia, which Sidney Powell used in her Michigan election lawsuit.”

In his affidavit, Keshavarz-Nia makes reference to Hammer and Scorecard, which Fanning declared as proof of the existence and validity of Hammer/Scorecard. However, upon closer examination, Keshavarz-Nia based his reference solely on the confirmation of Lt. Gen. McInerney, Kirk Wiebe, and Dennis Montgomery.

Fanning and Jones’s iterations of their claim to possess the answer to the means by which the election was allegedly “stolen” have drawn in such well-known figures as MyPillow CEO Michael J. Lindell; Gen. McInerney; Attys. Lin Wood and Sidney Powell; and Wiebe, once a strong Montgomery [critic](#).

“Gen. McInerney has stated publicly he received all his information from Fanning with no independent confirmation,” Zullo said. “Kirk Wiebe, who has already declared Montgomery committed fraud against the MCSO, publicly claims he hasn’t seen any of Montgomery’s information but relies solely on Montgomery’s representations and Dennis Montgomery himself. This is hardly independent proof being it all originates with Montgomery. It proves nothing.”

“The USIC has developed the Hammer and Scorecard tools, which were released by Wikileaks and independently confirmed by Lt. Gen Thomas McInerney (USAF, retired), Kirk Wiebe, former

NSA official and Dennis Montgomery, former CIA analyst),” Keshavarz-Nia wrote in his affidavit.

On October 31, 2020, Fanning and Jones shocked the world when they [reported](#) that Montgomery had determined that an alleged government supercomputer dubbed “The Hammer” was switching votes en masse from Donald Trump to Joe Biden. Their article, issued three days before Election Day, claimed that “The Hammer,” along with software Montgomery called “Scorecard” which he said he invented, targeted eight states in a vote-switching scheme aimed at stealing the election for Biden.

Offering yet an even more salacious allegation, Montgomery claims, without a shred of evidence, that former FBI Director James Comey [demanded](#) that Montgomery turn over his purported Scorecard software source code to the FBI as part of a 2015 immunity agreement with the DOJ. The January 3, 2021 *American Report* [article](#) claims that the DOJ and the CIA have the Scorecard source code and Comey was the last person to acquire it. Also according to the article, Montgomery did not give the software’s source code to either China or the United Kingdom, which Montgomery recently claimed possess clones of the original “Hammer.”

To this Zullo cautioned:

I would be very leery of the claim that Comey ordered Montgomery to turn over the only copy of “Scorecard.” It is Montgomery removing the liability of having to ever produce the software that can be the only verification of his claims.

This in my opinion is a setup, Montgomery has shielded himself from having to produce the program because he says the FBI has it; go ask them. This is a tactic he has used in the past and failed, only this time he has set the stage with the excuse prior to being asked to produce it. He avoids producing evidence to verify his claim. When the FBI says they don’t have it, Montgomery will tell you they are lying. So once again he does not have the software.

It appears Montgomery wants by inference to leave the reader with the notion that Comey and other government officials gave the vote-stealing software to aid foreign governments in their evil endeavors. Again, this is out of the mind of Montgomery with zero proof of the allegation and Fanning just prints it. There is no proof that this Scorecard thing ever existed and no proof that this was the focal point of the immunity agreement. This is just what Montgomery is saying today.

Montgomery had threatened a number of times to sell his information to the Russians during the investigation. He would point out homes of what he described as Russian Mafia figures and tell us he could sell it to them. He was always angling for money. He would try to use the threat of selling the info as leverage against us. This is illustrated in 2014 real-time emails that were turned over in federal court. Montgomery is always trying to sell “The Hammer” and his information to anyone who will pay him.

It is also my understanding that Fanning has been trying to peddle Montgomery and his purported Hammer capabilities by approaching people with claims he has a back door into the government machine and can get information that would garner national attention. I think this information may be true; I turned over a recording of Montgomery telling us that he has a back door into the government computer and can access it at will, again without proof. My personal opinion is Montgomery uses the Hammer story to cover up for his own misdeeds. “Blame the government” is his central theme. Montgomery is going to position himself as the man who has or can get the info you need: pay him and he will get it, and he will do his best to make it all look real. Fanning is playing with fire.

In an even more astonishing allegation, Montgomery claims that there are now [three](#) Hammer systems operating in different countries, alleging someone other than him transferred the technology.

Despite a lack of evidence or corroboration, the “Hammer/Scorecard” narrative has been replicated on countless blogs and alternative media sites, while becoming front-and-center at Howse’s website and WWV-TV broadcasts. All the while Fanning and Jones have been concealing Montgomery’s lengthy history of [unsubstantiated](#) claims; false [accusations](#) made against others, including a sitting [governor](#); and role in a 2003 international [incident](#) in which the U.S. asked France to ground a number of airliners for fear of a terrorist attack. Rather, the duo has relied solely on Montgomery’s word and the very minimal documentation he has provided against the backdrop of accusations, at least one of which was made under oath, of his falsifying an [email](#) provided in court as evidence.

The result of the naivete and lack of due diligence or perhaps outright omission on the part of the two self-declared “investigative journalists” is that some of America’s most prominent people are now ensnared in an unsubstantiated story which continues to evolve, jeopardizing their good reputations, credibility, and potentially their livelihoods.

Zullo has had [much to say](#) and testified to his time overseeing Montgomery’s purported production of evidence to the Sheriff’s Office over the course of 2014. As The Post & Email has carefully documented since [late 2015](#), when Zullo first spoke about the assignment, an initial compilation of thousands of data records Montgomery proffered to the MCSO led Arpaio to believe that Montgomery’s claim of government-initiated bank-account breaches victimizing Maricopa County residents required investigation. However, when Zullo and Mackiewicz brought 47 hard drives provided by Montgomery as evidence to three former high-level NSA employees, one of whom was Wiebe, and were told in a scathing [report](#) they contained nothing of value or even of government origin, the investigation was concluded, along with Montgomery’s remuneration of \$10,000 monthly.

In a 2019 [interview](#) between former NSA official Bill Binney, another of the three analysts to whom Zullo and Mackiewicz delivered the hard drives, and Jason Goodman of “Crowdsourced the Truth,” Binney can be heard describing his interaction with the detectives and the information proffered by Montgomery.

[\[Embedded video\]](#)

Tellingly, Binney states that while he believes Montgomery's claims require investigation, he also speculates that Montgomery could be engaged in "nefarious activity for the CIA." He stated that the information they viewed from Montgomery's hard drives did not originate with any NSA Tap, but rather, came from Montgomery's own Tap. He went on to say Montgomery was doing something but it was not the NSA from what they could determine.

In a December 23, 2020 [interview](#) with *The New American*, Wiebe stated he "has a friend who is operating The Hammer on his computer," with the video having been removed from YouTube's servers. "If true, by his account it would appear that anyone can get access to the 'Hammer' from their basement," Zullo observed.

It was Zullo who created all of the recordings of Montgomery's MCSO interviews on his iPhone in a law-enforcement capacity with Montgomery's consent, a detail Fanning and Jones have failed to disclose, instead echoing Montgomery's more recent claim that he was "[illicitly recorded](#)."

Fanning and Jones dubbed Zullo's recordings "[The Whistleblower Tapes](#)" after they were played during Arpaio's federal trial in November 2015 and leaked to *The Phoenix New Times* without disclosing that PNT published them first. Zullo has said over the years that Fanning did not have all the recordings of all the information or knowledge the Sheriff's Office had gleaned as a result of the investigation.

Rather than doing the necessary due diligence and background on Montgomery as well as acknowledging Zullo was responsible for uncovering Montgomery's fraud perpetrated on the sheriff's office and their original source on the story, Fanning and Jones instead have dedicated time and effort in attempting to whitewash Montgomery and discredit Zullo in some of the most blatant defamatory ways, particularly in their [book](#) published last August titled, "THE HAMMER is the Key to the Coup: The Political Crime of the Century."

Zullo is The Post & Email's source of information on the Montgomery investigation and the recording in which Montgomery states he did not construct The Hammer. Zullo is a firsthand witness who interacted with Montgomery for over 16 months in an official capacity. Zullo has always brought documentation to substantiate his claims, most of which was testified to and supporting documentation turned over in federal court, as The Post & Email reported in November 2015 as it [unfolded](#).

“Hammer” Hoaxer Infiltrates Lindell’s “Absolute Proof,” Part 2

"UNPROVEN CLAIMS"

by Sharon Rondeau

<https://michaeljlindell.com/>

(Feb. 11, 2021) — On Trump’s last Friday in office, MyPillow CEO Mike Lindell was [photographed](#) at the White House with typewritten notes he carried into a brief meeting with Trump appearing to suggest options by which Trump might remain in office via invocation of the Insurrection Act and a possible “National Emergency” declaration stemming from a September 2018 executive order concerning foreign interference in U.S. federal elections. Notably, Lindell said in later interviews that he shared information he received from [The American Report](#)’s Mary Fanning with Trump and/or those surrounding the president at the time.

On February 5, Lindell, a longtime Trump supporter, released a two-hour video, “[Absolute Proof](#),” with Fanning credited as one of the producers and main sources of information, during which he presented what he claimed to be evidence of widespread 2020 ballot fraud in several “swing” states sufficient to change the outcome of the election. Without providing a source, Lindell displayed statistics resembling those exhibited by former White House Trade Advisor Peter Navarro in his three-part [report](#) produced after the election claiming that Trump, in fact, won the election over Democrat Joe Biden..

The Post & Email cannot confirm Lindell’s data was extracted from the “Navarro Report.” However, numerous lawsuits filed on behalf of the Trump campaign which did not receive oral argument made similar [allegations](#) as to illegal voting in Nevada, Arizona, Georgia, Wisconsin, Michigan and Pennsylvania allegedly more than sufficient to alter the election outcome.

At the 1:36:00 mark in the video, Lindell introduces Fanning, who has now altered her “Hammer and Scorecard” narrative to one in which she alleges that foreign countries commandeered the election away from Trump in acts of “cyberwarfare.” In fact, during her approximately 20-minute soliloquy, Fanning does not mention “Hammer” or “Scorecard,” nor does she mention the name “Dennis Montgomery,” even though in previous writings and broadcasts she has credited him with this work.

Image Source: [Richard's Watch](#); from *The American Report*, [January 3, 2021](#)

Through the use of video technology, Fanning claimed in Lindell’s video that China, Iran, Iraq, Pakistan and other countries penetrated U.S. election systems, county by county, switching votes from Trump to Biden by the thousands. To purportedly back up her reporting, Fanning presented documentation displaying columns of data, including alleged IP addresses of bad actors involved as well as targeted IP addresses where votes purportedly resided in electronic voting equipment and were changed from Trump to Biden. She also revealed a dazzling video presentation depicting an unblockable array of attacks via the internet on election machines throughout the United States. China was the worst foreign offender, Lindell and Fanning alleged.

Mike Zullo, who was assigned by then-Sheriff Joseph Arpaio to oversee Montgomery’s [work](#) as a confidential informant for the Maricopa County Sheriff’s Office (MCSO) throughout 2014, told The P&E that the video presentation and IP addresses are “hallmark Montgomery.” “I have seen this before in dealing with him,” Zullo said. “Montgomery’s tantalizing depiction is designed to have the viewer believe all these countries worked in tandem precisely at the same time in a choreographed cyber dance altering vote counts. That same video ‘documentation’ appeared on Montgomery’s website, [Blxware.org](#), some weeks prior to the Lindell documentary and have since been removed; this, too, is all Montgomery. Montgomery used [video presentations](#) to dazzle government officials as part of his scheme to defraud the government. I viewed them and they were also turned over as evidence to a federal court.”

Like Lindell, Fanning does not reveal her source other than to say that an undisclosed number of “cybersecurity analysts” reportedly working for the United States were responsible for gathering the evidence of election interference beginning on November 1, two days before election day.

Zullo told The P&E he is extremely concerned that Lindell has not been made aware of Montgomery's past and that none of Montgomery's information has been properly vetted. "Lindell may very well end up being a victim of another con and Fanning has brought this trojan horse into Lindell's world," Zullo continued. "Fanning's new tactic of not revealing the name of her source, which is easily determined by the revelation and previous crediting of Montgomery by name in her many articles over many months, clearly demonstrates that she is actually aware of Montgomery's credibility issue. I know she is acutely aware of his defrauding the sheriff's office yet she continues to remain silent and conceal him from public view and scrutiny. A simple internet search would have revealed it all."

Montgomery was credited in a 2010 Playboy article as "[The Man Who Conned the Pentagon](#)" for having claimed, in the years following the 9/11 attacks, that software he allegedly invented could detect hidden messages in Al Jazeera broadcasts. Montgomery's claim contributed to a declaration by then-DHS Secretary Tom Ridge of a "[Code Orange](#)" resulting in the grounding of French airliners just before Christmas and of Pentagon officials considering shooting down additional aircraft. It was later determined that none of the information was valid.

"This doesn't bode well for Mike Lindell who, from my observation, honestly believes the Montgomery information brought forward by Fanning is legitimate," Zullo said. "Fanning's information was the grand finale of the film. It is just a matter of time before Montgomery comes to the surface and his work and reputation are thoroughly scrutinized. I fear it will all fall apart and the media will seize the opportunity to discredit everyone and their information appearing in the documentary. I understand that Montgomery's information already has problems. While I personally do believe there was voter fraud and election-tampering, and there are some very creditable people who presented information in Lindell's documentary, based on my personal experience, I find it very difficult to believe anything Montgomery brings to the table. Mary Fanning may very well have planted a poison pill in that body of work. This is either sheer journalistic dereliction or outright sabotage. It is just inconceivable to me that anyone with any gray matter in their head would interject this guy, with this background, into this national crisis that for certain will be litigated. The thought of Montgomery testifying on behalf of the President is absolutely horrifying. Fanning's concealment of Montgomery's identity smacks of premeditation and willful intent. She knows he is a land mine; she just does not want you to know.

"It is always important to remember that it is not what you know, think or believe; it is what you can prove that matters, and Montgomery has not been able to prove anything for seven years. He has never demonstrated that any software he claims he created since 2001 ever worked," Zullo said.

In his 2014 [book](#), "Pay Any Price: Greed, Power, and Endless War," author James Risen dedicated his entire second chapter to Montgomery's purveying of his purported inventions to the Pentagon and the CIA in the wake of the 9/11 attacks, claiming his software could detect an impending terrorist attack. The chapter includes Montgomery's denials of having misled Pentagon officials as to the software's capabilities while at the same time, revealing some of the pitfalls of the government's hiring of contractors whose primary interest is financial gain.

Montgomery attempted to [sue](#) Risen and his publisher over the chapter but failed to produce the software that would prove his claim and the case was dismissed.

Appealing to audiences apparently vulnerable to uncorroborated information, the documentary has garnered widespread distribution even while being censored by YouTube. Further, Lindell has been a guest on Steve Bannon's "[War Room](#)" and a number of other prominent radio programs touting the video, which he says presents the "absolute proof" as to how the election was taken from Trump.

The Post & Email asks why "Hammer" and "Scorecard" are no longer mentioned; who the purported "cybersecurity analysts" are who gathered Fanning's presented information and their level of expertise; how the data was gathered and verified; whether or not the purported evidence was provided to the FBI for investigation; and whether or not it has been corroborated. Are the charts Lindell claims as "absolute proof" "evidence," "proof," or neither?

In response to Lindell's video, Zullo said:

Every piece of evidence put forth must be weighed, challenged and perhaps substantiated by additional facts, i.e., other factual "evidence" to determine whether it is relevant and factual, either separately or in totality that is sufficient to bring the trier of fact to the logical conclusion that any of this actually occurred. Montgomery's trademark is to overwhelm with voluminous content, kind-of like hiding the devil in the details. It is all part of the grand illusion. To conclude what has been presented to be actual proof is premature. We are a long way from there at this point. Many people simply do not understand the difference between evidence and proof. What I have observed in the documentary can be categorized simply as evidence of the accusations, some of which admittedly is compelling at first blush. However, it is not absolute proof on any level at this juncture. That is not to say it won't be at some point in the future.

I do want to be very clear I fully support Mike Lindell and am grateful for the enormous sacrifice he has made to bring this information to the public. But I strongly believe that much of this comes down to credibility of witnesses, and Montgomery just does not have it. There are others who I believe can bring the very creditable information forward and will not be hampered by the monumental credibility issues of Montgomery. Additionally, should Montgomery's work become in conflict with others' or proven to be completely unfounded, as I suspect will be the case, it will do irreparable harm to the entire effort. Montgomery's stuff should have been left on the cutting-room floor. If Lindell was not made aware of Montgomery's issues, that responsibility rests squarely on Mary Fanning and Brannon Howse, because they know all about it. I know personally they both were warned.

In 2016, a federal judge wrote in an [opinion](#) that Montgomery committed "fraud" against the MCSO in 2014 by claiming to possess evidence of government surveillance but never producing it. In 2009, a federal magistrate judge referred Montgomery to the U.S. Justice Department for [perjury](#), an accusation which was not prosecuted due to the lawsuit from which it arose reaching a settlement. A third federal judge, Rudolph Contreras, [admonished](#) Montgomery for failing to provide the software and source code at the heart of his defamation lawsuit against Risen which Montgomery himself initiated.

The “analysis” to which Fanning referred in the Lindell video consists of a chart bearing multiple columns of data alleging thousands of pages of the type of documentation as shown on the WVW-TV broadcast of [January 13](#), albeit lacking a source or forensic evidence.

On Monday, former CIA agent, former State Department Office of Counterterrorism official and business owner Larry C. Johnson published his observations of Fanning’s assertions in the Lindell video at [The Gateway Pundit](#), writing:

Mary Fanning claims to have evidence that foreign servers, including locations in China and Iran, were changing vote totals in specific counties. Unfortunately, she has not published any of this alleged evidence. You just have to trust her. But I dug into the information she is relying on and learned that her source is [Dennis Montgomery](#)...

The key to beating the lie that there was no election fraud is evidence—documentary, electronic and eye witness. The fact that Dennis Montgomery, according to Mary Fanning, is at the heart of this worries me.

Updated information The Post & Email received just prior to press time appears to support Zullo’s concerns. In an update to Johnson’s article of which The Post & Email learned just prior to press time, *The Gateway Pundit* wrote that software “technologist” and subject-matter expert Yaacov Apelbaum rendered an analysis of the data from Fanning’s presentation in the Lindell video, identifying a number of inconsistencies. GP [reported](#):

Here is what Yaacov observed:

1. The data is not sorted. That would be virtually impossible for any select output statement that created the file.
2. Many of the IP addresses do not match the source and target locations specified.
3. Some of the company/entity names don’t match the location specified.
4. The document uses DBA names for companies instead of the actual legal name, which is what you would get if you did an actual IP-> organization resolution.
5. All of the destinations are protected with firewalls, so, the “INTRUSION METHOD” referencing the word “FIREWALL” is meaningless. Also, from the limited attack vocabulary it obvious that whoever wrote this is not familiar with actual cyber offensive operations.
6. Source date format is incomplete and is missing the time zone
7. Some of the records are incomplete, for example row 24 states that “TRUMP: DOWN 44,905”, but failed to add the “Y” entry under the “SUCCESS” column
8. The tabs on the spreadsheet show that the titles were created manually (“Sheet 1” vs. “Sheet1”), which is unlikely if this date came from an automated process

9. The values in the field titled “TARGET ID”, which have the format of a MAC address, were most likely created with a random number generator. A sampling of some of these numbers yielded no results

With the unvetted information from Fanning and Jones, Lt. Gen. Thomas McInerney (Ret) has touted “The Hammer ” in various forums as the answer to why Trump lost the election and described Montgomery as “a world-class American statesman,” no doubt without knowledge of Montgomery’s past. WVW-TV host Brannon Howse has hosted Fanning touting Montgomery by name on prior broadcasts, but inexplicably stopped referencing Montgomery by name, as did Fanning, several weeks before Lindell released his video on which all three, along with Jones, are credited as contributors and/or co-producers. By that time, Montgomery was known only as the SOURCE. Clearly not an accident, but a coordinated effort.

Much of what has been brought forth by Fanning appears to coincide with Montgomery’s past method of operation that is easily gleaned from his documented history and Zullo’s firsthand experience with Montgomery.

The 2011 *New York Times* [article](#) cited in [Part 1](#) states that former Republican Senator Conrad Burns spoke to Montgomery’s fraudulent demonstrations of his non-functional software, obviously impressed by what he saw “In an interview, Mr. Burns recalled how impressed he was by a video presentation that Mr. Montgomery gave to a cable company. He talked a hell of a game,” the article reported.

Prior to Twitter [closing](#) his accounts, Lindell tweeted links to *The American Report* ‘s articles with a reference to “[Blxware.org](#)” purporting that along with the federal government, the now-defunct company for which Montgomery worked between 2006 and 2009, Blxware, was engaged in illegal surveillance. On the website, Montgomery sought donations to fund his alleged exposure of government corruption and had raised more than \$74,000; as of this writing, the fundraising portal appears to have been removed. Zullo warned earlier that Montgomery was going to try to “[monetize](#)” his new efforts, which he did.

On Tuesday, Jason Goodman of “Crowdsource the Truth” [called](#) Lindell at his office and attempted to caution him about Fanning’s source, a gesture Lindell rejected. “I didn’t get my information from them, sir,” Lindell told Goodman. “I got my [information] from other sources inside the government that have nothing to do with them...”

Lindell briefly appeared interested in Goodman’s offer to “help,” but moments later ended the call abruptly with, “Lose my number...you’re working for Dominion. Goodbye.”

Questions remain as to the motive(s) behind Fanning and Jones’s persistence in promoting unproven claims which continue to shift from one focus to another. Responsible investigative journalism involves time-consuming research, verification through interviews with firsthand witnesses and collection of official documentation, and corroboration by others without an agenda and provable expertise in the subject matter. Regardless of how often a claim is made,

without verifiable evidence to support it, the claim remains nothing but an effort to dominate headlines, garner website clicks and deliver financial profit to its purveyors.

What follows is a meticulously-researched timeline of litigation involving Dennis Montgomery beginning in 1993. As demonstrated by frequent excerpts from court transcripts and links to news articles, all items are gleaned from public information. Given the history, readers should judge for themselves whether or not Montgomery's claims, absent verifiable evidence, can be considered credible.

Litigation History of Dennis L. Montgomery, 1993-present

September 1993: A former research assistant, Penne Page, at 3Net Systems, Inc. sues her former supervisor, Dennis Montgomery, the company's [vice president](#) holding partial [ownership in the company](#), for sexual harassment.

Court records show Page, who was employed as a research assistant, would level the following accusations against Montgomery in her lawsuit:

“On many occasions during plaintiff's employment, Montgomery asked plaintiff to orally copulate him. During the last six months of her employment, plaintiff was required to travel to job sites in the United States and Canada. Several times, Montgomery told plaintiff he was going to show up at one of the jobsites and have sexual relations with her. On two occasions, Montgomery masturbated in plaintiff's presence during working hours, demanded that plaintiff watch him, asked to touch her breasts, and asked if it " 'turned her on' " to watch him. During one such incident, the plaintiff ran from the office to her car, but Montgomery followed her, grabbed her arm, attempted to grab her breasts, and tried to prevent her from getting into her car.”

Montgomery's attorneys would take a position claiming he could not be held personally liable. While initially Montgomery prevailed on this theory, Montgomery's legal victory was short-lived. Page will appeal the decision and is ultimately granted a “writ of mandate” reversing the lower court's decision, reinstating Montgomery's legal liability, and Page is also awarded attorney's fees. While this ruling does not determine guilt or innocence, it indicated the appellate panel's disagreement with the premise upon which Montgomery maintained he could not be held liable under California law.

<https://law.justia.com/cases/california/court-of-appeal/4th/31/1206.html>

July 26, 1995: An SEC filing indicates Page and 3Net reached a settlement:

10.39 Settlement Agreement dated July 26, 1995 between the Registrant and Penne M. Page (incorporated by reference to Exhibit 10.70 to Form 10QSB for the quarter ended September 30, 1995).

<https://www.secinfo.com/duhPy.91d.htm#2ndPage>

September 30, 1996: In an administrative [action](#), the Securities and Exchange Commission (SEC) issues a “cease-and-desist proceeding” against 3Net Systems, Inc. after discovering “FALSE AND MISLEADING DISCLOSURES IN 3NET'S FORM S-18 AND FISCAL 1992 FORM 10-KSB” associated with software, “FAILSAFE,” which did not perform as billed or was not provided as contracted.

<https://www.sec.gov/litigation/admin/337344.txt>

September 28, 1998: Montgomery and Warren Trepp form “Intrepid Technologies, LLC,” later renamed eTreppid Technologies (p. 6 of referenced PDF), with Montgomery designated as “Chief Technology Officer and Committee Member” (p. 103).

<https://www.scribd.com/document/276963425/ET-v-DM-State-644-11-Thru-19-Feb-7-2006-Hearing-Exhibits>

July 16, 2004: Gianna G. Santistevan files for a temporary restraining order for “domestic violence” against Dennis L. Montgomery which is granted and maintained for approximately 14 months. Case No. FV04-02745, Washoe County, NV

The District Court is comprised of 15 Departments. Each Judge sits in a differently numbered Department. When a Judge leaves service, the new Judge's name replaces the former Judge's name on all matters pending and previously closed in that department. This change will not reflect that a previous sitting Judge presided over a matter.

Full case docket:

<https://www.washoecourts.com/Query/CaseInformation/FV04-02745>

January 10, 2006: Montgomery abruptly leaves eTreppid and an FBI investigation is launched into missing source code and classified information (p. 6).

<https://www.thepostemail.com/wp-content/uploads/2019/08/275559455-DM-FBI-Search-70-Gov-Docs-Unsealed-D-nev-3-06-Cv-00263.pdf>

In early February 2006, eTreppid files suit against him for allegedly stealing source code necessary to fulfill the company's Air Force contract

Later that year, Montgomery countersues eTreppid for allegedly failing to compensate him for his "copyrighted" inventions while he worked there.

<https://www.scribd.com/document/276963247/ET-v-DM-State-644-21-22-Feb-7-2006-Transcript-Vol-2#download>

During his testimony, Warren Trepp accuses Montgomery of "lying" to him (p. 101)

<https://www.scribd.com/document/276963247/ET-v-DM-State-644-21-22-Feb-7-2006-Transcript-Vol-2#download>

January 31, 2006: Trepp tells the FBI that Montgomery "has a bad temper and has been verbally abusive to employees and known to throw objects."

<https://www.thepostemail.com/2019/09/02/fake-news-in-the-age-of-the-internet-part-5/>

February 7, 2006: In a hearing in *eTreppid v. Montgomery*, Montgomery testifies that the year 1994 was "after 3net" and that he was

“self-employed as a consultant” with a company named “Pacific Consulting” between 1993 and 1998 (pp. 127-129 of [transcript.](#))

<https://www.scribd.com/document/276963247/ET-v-DM-State-644-21-22-Feb-7-2006-Transcript-Vol-2>

Trepp [testified](#) that Montgomery’s attorney and CPA had recommended that Montgomery be paid as a contractor as a result of "tax loss carry-forwards from prior lawsuits where he had losses in them and that he didn't need to get the deductions..."

<https://www.scribd.com/document/276963247/ET-v-DM-State-644-21-22-Feb-7-2006-Transcript-Vol-2>

5 “pattern recognition” and “anomaly detection” software. These programs are completely unrelated to
6 the software compression technology referred to in the Contribution Agreement, and were expressly
7 excluded. I have never, either on my own or as trustee of the Montgomery Family Trust, transferred or
8 assigned any of that technology to eTreppid.

9 10. From September 1998 through December 2003, I was paid by eTreppid Technologies
10 solely as an independent contractor and received Form 1099's. I received no employee benefits, had
11 separate health insurance, often worked at home, and worked on my own projects as I saw fit, other
12 than working to refine the software compression technology that I had transferred to eTreppid in return
13 for 50% of the company.

14 11. During that time period, Trepp began to dilute my shares in eTreppid f/k/a Intrepid
15 Technologies, and used his majority interest in Intrepid to obtain favorable treatment for himself as a
16 majority shareholder at my expense. In particular, he would “loan” me money, then sell my shares to
17 friends of his *and* make me pay him back virtually all of the money that he “bought” my shares with.
18 While my shares were devalued, his and those of his friends were increased in value.

<https://www.scribd.com/document/279996067/eTreppid-v-DM-26-2-Montgomery-Mar-13-2006-Declaration>

March 13, 2006: In *eTreppid v. Montgomery*, defendant Montgomery submits a sworn “Declaration” stating that “From September 1998 through December 2003,” he was “paid by eTreppid Technologies solely as an independent contractor” at the company despite having provided “software compression technology” to eTreppid “in return for 50% of the company” (p. 4).

“As of January 2004, I became an employee of eTreppid,” Montgomery then stated.

September 11, 2006: A former coworker of Montgomery’s at eTreppid, Sloan Venables, tells Air Force investigators Haraldsen and Smith that he found Montgomery “nuts and a crazy compulsive liar,” “abusive to subordinates,” and “would threaten subordinates and instruct them to not engage with TREPP” (co-founder of eTreppid).

AIR FORCE OFFICE OF SPECIAL INVESTIGATIONS REPORT OF INVESTIGATIVE ACTIVITY		
1. DATE OF INVESTIGATIVE ACTIVITY 23 JAN 2006	2. PLACE eTreppid LLC, Reno NV	3. FILE NUMBER
4. REMARKS On 23 Jan 2006, SAs HARALDSEN and SMITH interviewed VENABLES at eTreppid LLC. In addition to reiterating the information from his declaration, VEANABLES related the following information: He has known SUBJECT since December 1999 and had both a professional and personal relationship with him. He believed SUBJECT was “nuts and a crazy compulsive liar.” SUBJECT was unwilling to share his work with others and kept employees in the dark about company projects. SUBJECT was abusive to subordinates and created an atmosphere of fear. SUBJECT created fictitious stories about TREPP and claimed that he (SUBJECT) was the actual majority owner of the company. SUBJECT would threaten subordinates and instruct them to not engage with TREPP. Consequently, problems or issues within the company were not elevated to TREPP.		

VENABLES questioned SUBJECT’s technical capabilities. His suspicion was reinforced when he discovered SUBJECT’s workstation did not have the necessary applications installed to develop source code. VENABLES found this peculiar since this was purportedly SUBJECT’s primary responsibility as the Chief Technical Officer. Additionally, VENABLES designed the dual Zeon processors used by SUBJECT to operate as a cluster. However, when SUBJECT changed the operating system to Windows XP this required the computers to work as independent systems. VENABLES said SUBJECT’s actions were irrational and divergent since i caused the network of computers to operate inefficiently.

Trepp told investigators that eTreppid gave Montgomery \$1.3 million and a 50% ownership in the company at the outset in 1998. Trepp also said that since 1991, eTreppid loaned Montgomery “a total of about \$1.5 million” due to financial difficulties and that approximately one month before Montgomery departed eTreppid, “7-8 Dec 2005,” Montgomery requested a loan of \$270,000 “to pay down casino and other debts.”

On 28 September 1998 SUBJECT was hired by eTreppid to become the Chief Technology Officer. SUBJECT was paid \$1,300,000 and made a 50% partner in eTreppid in exchange for the data compression Source Code that he developed prior to his employment with eTreppid. During SUBJECT's ownership - SUBJECT required some liquidity and sold a two percent of stock in the company for \$1.5 million. This stock was sold to two of TREPP's associates for \$750,000 each. With the sale of the stock and other capital call dilutions SUBJECT reduced his stake in the company to 30%. TREPP was aware that SUBJECT was having financial difficulties and since Jan 1999, TREPP loaned SUBJECT a total of about \$1.5 million to assist him with his financial burden. On 7 or 8 Dec 2005, SUBJECT asked to borrow an additional \$270,000. When asked what the additional money was for, SUBJECT told TREPP that it was “to pay down casino and other debts.” TREPP said he discovered through informal sources that SUBJECT owed \$300,000 to various casinos.

<https://www.scribd.com/document/275559455/DM-FBI-Search-70-Gov-Docs-Unsealed-D-nev-3-06-Cv-00263>

Trepp said disks expected to contain “all data on the Source Server” were found to be “blank or contained no data relevant to eTreppid's development efforts.”

Trepp advised that he required Montgomery to provide him a copy of all data on the Source Server once every year to protect ~~both himself and Montgomery should something ever happen to this~~ data. Trepp advised that when he learned that the Source Server had been deleted and Montgomery refused to return to work, he looked at the copies provided by Montgomery over the years, and found that these disks were blank or contained no data relevant to eTreppid's development efforts.

October 30, 2006: In *Montgomery v. eTrepid*, Montgomery accuses former business partner and defendant Warren Trepp and then-U.S. Rep. Jim Gibbons of “illegal physical and electronic surveillance,” “eavesdropping and wiretapping” and states that he plans to file additional legal actions.

Montgomery testifies that Gibbons and Trepp were seeking to “initiate criminal action against me.”

4 of 23

QF

25 5. More recently, notwithstanding the unconstitutional raid perpetrated on my home and
26 storage by Warren Trepp using his political influence with James Gibbons, (Gibbons has admitted
27 making “phone calls” to initiate criminal action against me on behalf of Trepp), Daniel Bogden and
28

-3-

20 of 23

13 the basis for Trepp's political influence in Nevada and within the Air Force. In November, 2005, in
14 one of my many fights with Trepp over licensing my technology used in the special Government
15 contracts, Trepp threatened to “bury me” with his political influence over Bath and Gibbons. I
16 believe the FBI/Air Force raid on my home and property was the result of that influence to steal my
17 technology for Trepp. Gibbons has admitted that he initiated the criminal investigation against me.

18 **Claims I Intend to Bring Not Yet Filed**

19
20 35. The fact that Trepp and Gibbons improperly influenced the FBI to raid my home and that
21 they have continued to conduct “surveillance” on me, including what I believe to be illegal physical
22 and electronic surveillance, including eavesdropping and wiretapping, leads me to believe that they
23 have used their secret surveillance program on AT&T customers to intercept my phone records. I
24 have been an AT&T customer. If this litigation is to proceed, I will intervene in the case of *Hepting v*
25 *AT&T* as a Plaintiff against AT&T and the Government. I will also bring claims similar to those
26 brought in the AT&T case in this Court. In that action, I understand that the Government intervened
27

<https://www.scribd.com/document/277361190/Montgomery-v-eTreppid-228-Oct-30-2006-Montgomery-Declaration>

In the same case, Montgomery claimed he possessed “no classified information” (p. 4):

1 the local FBI, I have provided the "output" from my decoding programs, without compensation, to
2 our Government in order to stop terrorist attacks and save American lives. My source codes for this
3 decoding technology which derives from my "ODS" are what Trepp and several Government
4 officials were attempting to steal from me when they raided my home.
5
6 6. The Government has now held my computers and storage media for over six months
7 knowing I do not have possession of any "classified information" and knowing that all of the source
8 codes used on the special Government contracts worked on by me at eTreppid Technologies are
9 owned by me. No other person within our Government or at eTreppid has ever had access to the
0 source codes used on the special Government contracts. Anyone who swears under oath to the
1 contrary is lying and/or committing perjury. Obviously, if they did have access to this technology,
2 Trepp would have licensed and/or sold it to the Government for hundreds of millions of dollars. I
3 completely and zealously guarded the secrecy and confidentiality of my source codes used on the
4

<https://www.scribd.com/document/277361190/Montgomery-v-eTreppid-228-Oct-30-2006-Montgomery-Declaration>

November 1, 2006: *The Wall Street Journal* reports Montgomery's allegation against U.S. Rep. Jim Gibbons of accepting a bribe from Warren Trepp while on a cruise which an FBI investigation two years later found to be unsubstantiated.

<https://web.archive.org/web/20150829013604/http://www.wsj.com/articles/SB116234941031409783>

<https://lasvegassun.com/news/2008/nov/02/attorney-gibbons-cleared-fbi-probe/>

December 14, 2006: Montgomery files a Qui Tam lawsuit against Trepp, eTreppid, several of its employees, Gibbons, an FBI agent, Air Force investigator and others “for violation of the False Claims Act” with the claim that Trepp was attempting to steal Montgomery’s software source code and “defraud the Government.”

<https://ia601304.us.archive.org/8/items/gov.uscourts.nvd.52186/gov.uscourts.nvd.52186.2.0.pdf>

Qui Tam allows for the “whistleblower” to collect a financial award if successful.

<https://legaldictionary.net/qui-tam/>

At the time, Montgomery claims to be the sole owner of software and source code “valued in the hundreds of millions of dollars and critical to the war on terror” (p. 2). He also claims to have been a potential whistleblower and levels a bribery claim against Trepp involving then-U.S. Rep. Jim Gibbons (p. 2).

<https://ia801304.us.archive.org/8/items/gov.uscourts.nvd.52186/gov.uscourts.nvd.52186.2.0.pdf>

ownership of valuable software exclusively owned, controlled, and solely possessed by relator Dennis Montgomery used on said contracts. In sum, Trepp's scheme to defraud the Government was part and parcel of his scheme to defraud Montgomery. Montgomery's software is valued in the hundreds of millions of dollars and is critical to the war on terror. In order to perpetrate his scheme, defendant Trepp paid hundreds of thousands of dollars to defendant United States Congressman James Gibbons for the purpose of: (i) procuring numerous military contracts requiring the use of Montgomery's software; and (ii) for the corrupt manipulation of the justice system by both Gibbons and Nevada U.S. Attorney Daniel Bogden. Gibbons was instrumental in securing Bogden his job as U. S. Attorney through his substantial influence within the Nevada Republican Party.

2. At the behest of Trepp and Gibbons, Bogden directed and authorized the Reno office of the FBI to conduct a patently illegal and unconstitutional raid on Montgomery's home and storage facility for the purpose of seizing, in effect, "stealing," the "source codes" to Montgomery's software; and also to prevent Montgomery from blowing the whistle on Trepp, Gibbons, and other federal officials involved with them.

3. One of these officials is defendant U.S. Air Force special agent Paul Haraldsen, who had worked with Montgomery on several of the contracts, and represented to Montgomery that he, (Haraldsen) had become the designated Government liaison to Montgomery replacing other individuals from [REDACTED] and other US Agencies. Based on Haraldsen's statements, Montgomery believed that Haraldsen was working for USSOCOM (United States Special Operations Command) with direct access to Secretary of Defense Rumsfeld and other high level Defense Department officials. Between early 2004 and January,

2006: Edra Blixseth launches software-development company Opspring, later renamed Blxware, hiring Montgomery to serve as a partner. Blxware would enter a government contract lasting only four months due to the software at the center of it failing to meet expectations

June 22, 2007: A sworn affidavit from a forensic expert reports that an email Montgomery submitted to the court as "true and accurate" in litigation with Warren Trepp was altered.

19
20
21
22
23
24
25
26

18. Based on the foregoing analysis, it is my expert opinion that the original email, as sent from Mr. Glogauer to Mr. Trepp on September 25, 2003, did not contain the sentence “We need to take care of him like we discussed.”
19. I am informed and believe that a “txt” file was submitted to the Court by Mr. Dennis Montgomery on June 12, 2006 as a “true and accurate” copy of the September 25, 2003 Len Glogauer email. This “txt” document is not a verifiable or accurate copy of the original email as I found it in several locations in the eTreppid facility.

<https://www.scribd.com/document/274988566/Montgomery-v-eTreppid-199-Declaration-of-Jonathan-Karchmer>

May 29, 2008: Magistrate Judge Valerie P. Cook orders Montgomery to produce the source code at issue in *Montgomery v eTreppid*

<https://www.scribd.com/document/275664852/Montgomery-v-eTreppid-645-Order-Re-Source-Code-D-nev-3-06-Cv-00056>

July 3, 2008: In *Montgomery v eTreppid*, Montgomery is questioned at a Show Cause hearing by a defendant's attorney, who summarizes and confronts Montgomery on documents and materials requested by the court but not produced over a lengthy period of time.

<https://www.scribd.com/document/272718716/Montgomery-v-eTreppid-731-6-24-OSC-Hearing-Transcript>

Magistrate Judge Cook also overrules Montgomery's objections to her order to produce the source code at the heart of Montgomery's claim to ownership (p. 1). Cook states that "Judge Perry" found in 2006 that Montgomery "took or deleted source code from eTreppid's computers" (pp. 1-2)

3 On June 27, 2008, Magistrate Judge Cooke entered an Order (Doc. #707)
4 granting a Stay of the June 30, 2008 deadline for filing a plan for production of the source
5 code contained in her Order (Doc. #645), pending further Order of this Court (Doc. #707).
6 On June 30, 2008, Defendants eTreppid Technologies, LLC and Warren Trepp filed a
7 Response to the Montgomery Parties' objections (Doc. #715).
8 In accord with the provisions of 28 U.S.C. § 636, and Local Rule 1B3-1 and 3-2,
9 the Court has reviewed the proceedings before Magistrate Judge Cooke which resulted in
10 the entry of the Order Regarding Source Code Discovery (Doc. #645). The Court finds that
11 the Montgomery Parties' objections to Magistrate Judge Cooke's Order must be overruled,
12 and the Order Regarding Source Code Discovery (Doc. #654) entered by Magistrate Judge
13 Cooke must be affirmed.

July 24, 2008: Magistrate Judge Cook berates Montgomery and his counsel, Deborah A. Klar, for failing to produce the source code and orders a “Show Cause” hearing:

15 In drafting the Source Code Order, this court was very aware of the complicated
16 undertaking it was requiring of the Montgomery parties, and it endeavored to be reasonable about
17 the Montgomery parties’ compliance. However, even if the court were to construe as genuine the
18 Montgomery parties interpretation of the Source Code Order as merely requiring a timeline, the
19 notice before the court would be completely deficient. The Montgomery parties’ notice does not
20 set a proposed timetable or a plan delineating steps and intermediate deadlines by which they
21 would successfully comply with Source Code Order. Their notice simply states their
22 interpretation of the Source Code Order and successive court orders, and then sets their own
23 deadline for production. The Montgomery parties have been on notice that these documents
24 might be subject to discovery since mid-2006, but at the very least, by November 2007 (#431).
25 Once again, they protest that they do not have enough time.

26 Moreover, in complete defiance of *three* court orders requiring the production of source

26 Moreover, in complete defiance of *three* court orders requiring the production of source
27 code related to object tracking, pattern recognition, and anomaly detection, the Montgomery
28 parties state that they “respectfully” disagree. Notably, the Montgomery parties have continually

1 informed this court that they “intend” to file a Writ with the Ninth Circuit to vacate the Source
2 Code Order. To this court’s knowledge, this has not been done. Further, although they have
3 already sought and been denied a stay from the District Court pending appeal to the Ninth Circuit,

4 the Montgomery parties purport to grant themselves a stay in their notice by stating that they will
5 not produce any documents related to object tracking, pattern recognition, and anomaly detection
6 until after the Ninth Circuit has made a determination on their unfiled Writ. Finally, the court
7 notes that despite their assertions, the Montgomery parties have yet to request a modification of
8 the protective order.

9 It is quite clear to both this court and the District Court that the Montgomery parties'
10 "notice of compliance" represents their intent to defy the court's orders by any means necessary.

11 **III. CONCLUSION**

12 Based on the foregoing and for good cause appearing:

13 **IT IS HEREBY ORDERED** that a hearing to show cause as to why the Montgomery
14 parties and Deborah A. Klar, counsel for the Montgomery parties, should not be held in contempt
15 for failure to comply with the Source Code Order is set for **Monday, August 18, 2008, at 10:00**
16 **a.m.;**

17 **IT IS FURTHER ORDERED** that Dennis Montgomery shall appear in person at the
18 hearing to show cause and be prepared to testify as to the matters at issue in this order;

<https://www.scribd.com/document/275665451/Montgomery-v-eTreppid-769-OSC-Re-Source-Code-Nev-3-06-Cv-00056>

July 25, 2008:

September 3, 2008: In his case against eTreppid, Montgomery is questioned as to his inconsistent testimony regarding whether or not he possessed information which could have been covered by the "State Secrets Privilege" in connection with an FBI search of his home in March 2006. Upon request, Montgomery reads from his own earlier testimony stating he did not possess classified information but is confronted on his claim ([May 14, 2008](#)) that he cannot produce certain documents because they are classified (pp. 105-113):

2 Now, you also testified that the FBI seized
3 material may or may not contain State Secret Privilege.

4 Do you recall that testimony.

5 A The FBI --

6 Q The FBI seized material may or may not contain State
7 Secrets Privilege?

8 A Yes.

9 Q And that's been one of the reasons why you haven't
10 produced it, isn't that correct?

11 A Are you talking about the 21 hard drives?

12 Q 21 hard drives, the CDs, everything that the FBI seized.
13 From time to time, you claimed that it contains FBI -- excuse
14 me, State Secret Privilege. And you have, therefore, been at
15 a loss on how to get it produced quickly.

13 over six months, you say they took it knowing you did not have
14 possession of classified information, correct?

15 A That's correct.

16 Q And now you've taken the position that there is
17 classified information on that seized material, correct?

18 A No. I believe it's States Secrets Privilege.

19 Q Okay. Not classified information.

20 A I don't know the distinction between the two.

21 Q Okay. I want to ask another few questions. I believe
22 that there is a request to you that requires you to produce
23 all efforts to market, sell your -- or sell the Source Code
24 for the data compression, anomaly detection and the like.

25 A Right.

(Sept. 3, 2008)

<https://www.scribd.com/document/272718760/Montgomery-v-eTreppid-833-8-18-OSC-Hearing-Transcript>

A substantial percentage, i.e., sixty to eighty, of the Technology Data consists of files that the Montgomery Parties reasonably believe could fall within the provision of the U.S. Protective Order (Docket #253) and/or Non-Disclosure Agreements executed by Dennis Montgomery (“Montgomery”) in connection with work he performed for the Government (the “Protected Data”).

Montgomery, on his own, is physically incapable of segregating the Protected Data from other Technology Data by May 19, 2008. The files are not organized in a manner which enables Montgomery to be able to identify and segregate Protected Data from Technology Data with absolute certainty and confidence without actually looking at each file.

In communications with the Government, the Montgomery Parties have proposed to give all of the Technology Data to the Government and let the Government identify the Protected Data. Montgomery would then produce to eTreppid all Technology Data not designated as Protected Data by the Government. The Government is not amenable to this approach. The Government

<https://ia800904.us.archive.org/14/items/gov.uscourts.nvd.46642/gov.uscourts.nvd.46642.604.0.pdf>

August 18, 2008: At a case management conference, Trepp attorney Peek states that numerous documents have still not been produced by Montgomery and that “I certainly do have numerous hard drives from Mr. Montgomery. Most of which, Your Honor, contain what I would refer to as garbage in; garbage out...” (pp. 12-13)

<https://www.scribd.com/doc/275665561/Montgomery-v-ETreppid-832-TRANSCRIPT-of-Aug-18-OSC-Hearing-D-nev-3-06-Cv-00056>

2 Sandoval or Blixseth.
3 So, yes, I want to take the depositions. I am
4 concerned, however, about proceeding with those depositions
5 wherein fact I have produced over 310,000 pages of documents,
6 I have a little less than that. I have nothing from Atigeo,
7 Sandoval or Blixseth. I certainly do have numerous hard
8 drives from Mr. Montgomery. Most of which, Your Honor,
9 contain what I would refer to as garbage in; garbage out.
10 And that will be the subject matter of the follow-up hearing
11 today.
12 JUDGE PRO: Right.

During the same hearing, Judge Cooke says she is “troubled” by Montgomery and his attorneys’ perceived attitude of, “So, we’re certainly not going to do it,” referring to her orders to produce evidence.

September 23, 2008: A settlement conference is convened by Judge Cook between Montgomery and Trepp.

<https://www.leagle.com/decision/infeco20080924747>

16 JUDGE COOKE: I do.

17 First of all, the Order to Show Cause, the subject
18 of today's Order to Show Cause hearing is not the supplement
19 that was filed, I believe it was on the 11th, or thereabouts,
20 of August. It was the -- the report, as Judge Pro has
21 indicated that basically said you're wrong; we aren't going
22 to do what the Court has ordered. Moreover, we plan to file
23 a motion for protective order, and appoint a special master
24 and so on, which the Montgomery parties subsequently had,
25 that's what we're here -- that's the subject of the Order to

1 Show Cause today. And this is what really disturbs me --
2 apart from, I'll tell you, any judge reading this order would
3 have the same, I suspect, reaction that Judge Pro and I did
4 the morning that we conferred about what was filed by the
5 Montgomery parties -- but what really troubles me is that
6 since the inception of this litigation, first, Mr. Montgomery
7 had Mr. Flynn. Then he and Mr. Flynn had a problem, so the
8 Liner firm comes in. Then Ms. Klar and Ms. Pham are on board.
9 And then what -- what we're getting, as time passes, and
10 trouble comes, is different lawyers stepping in and coming in
11 to say, well, you know, we can't -- we're sorry. We want to

12 turn the page and so forth. But the fact is, that this is
13 where we are today.

14 We have an order that was issued by this Court.
15 And I have, utterly, no problem with any party objecting,
16 filing an objection and taking it up to Judge Pro. That's
17 everybody's right. If you wish to do that, that's perfectly
18 fine with me. And if you want to go to the Ninth Circuit -- I
19 said in July, when Ms. Klar announced the intention to take
20 this matter up to the Circuit, that was fine. Go ahead. But,
21 do it. Don't come into this court and, well, this is what
22 we're going to do. And, by the way, you are in error. And we
23 simply are not -- are going to just completely disregard this
24 Court's order.

25 That is inexcusable. That is inexcusable. And

KATHRYN M. FRENCH, RPR, CCR
(775) 786-5584

1 because this pattern that I'm seeing has recurred time and
2 again -- you know, I appreciate very much, Mr. Sunshine, your
3 statement here today about how the Montgomery parties and your
4 law firm intends to proceed. But, the fact is -- and then,

5 you know, you file this supplement. And I've got problems
6 with the supplement.

7 Again, I find it sort of breathtaking that -- let's
8 see, the supplemental order appears to me, appears to me, to
9 try to rewrite the request for production of documents that
10 were the source of this whole piece of discovery litigation,
11 number one. And then we're told, well, this -- it's going to
12 really take too much time. And a lot of the computer software
13 and so forth that would be necessary, or the hardware, I
14 don't know, to respond to some of these. Well, it's just too
15 expensive. It's outmoded. So, we certainly aren't going to

19 Mr. Montgomery is not going to do it.

20 And then, then there's a statement that, in addition
21 to that, well, we're going to wait until, until 30 days
22 after the Court makes its determination on the motion for
23 appointment of a special master.

24 I am here to tell you that nobody is waiting
25 anymore. This court has really reached the limits of its

1 patience in terms of the Montgomery parties and counsel
2 dictating to this Court when its orders will be complied with,
3 and when it -- and, and continually -- this is another issue,
4 sir -- continually, well, no, we're now going to call the --
5 let's see, the requests for production, set one, numbers 3,
6 4, 6, 8, and 9, we're now calling that a new thing. And we're
7 just kind of recasting that.

The other judge at the conference, Judge Pro, imposed sanctions on Montgomery for his failure to comply with the court's orders (p. 63).

11 That did not occur here. The time was July 23. It
12 was not complied with. And as a result, I'm going to impose
13 a sanction, contempt sanction, monetarily, of \$2,500 per day,
14 from July 23rd, through the date of the production, whenever
15 that occurs. And if you can beat the 8th of September, that
16 will save your client no small degree of resources.

17 I think that that's -- while that's not an
18 insignificant penalty, I think that's a fair penalty given
19 the failures of Montgomery, and those representing, to comply
20 with clear unambiguous orders of the Court that were final
21 for purposes of this litigation. So, that will be the order.

September 27, 2008: Montgomery is charged with six felony counts for passing checks with insufficient funds at a Las Vegas casino:

January 2009: Montgomery goes to work for Blxware, LLC, formed by Edra Blixseth in 2008, to further develop pattern-recognition software he claims to have invented while working at eTrepid. Blxware was preceded by Opspring in 2006.

<https://www.dandb.com/businessdirectory/blxwarellc-bellevue-wa-3620202.html>

<https://www.courtlistener.com/opinion/4734191/in-re-edra-d-blixseth/>

Blixseth declared bankruptcy in March 2009.

<https://www.nytimes.com/2009/06/14/business/14yellow.html>

According to a future filing on the part of defendant United States in *Klayman v. Obama* in which Montgomery was the plaintiff (April 13, 2015, . (p. 2 footnote)

Mr. Montgomery is a self-described inventor and software developer, and co-founder of a now-defunct company named eTrepid Technologies, LLC. See Exh. 1 at 5. From 2003 to 2005 he performed work under a contract between eTrepid and the Air Force involving image-identification technology. Exh. 2; see Exh. 1 at 5–6; Exh. 3 ¶ 4.a. In 2009, Mr. Montgomery’s then-employer, Blxware, LLC, entered into a short-term agreement with the Air Force for purposes of evaluating “video compression and anomaly detection and tracking” software, developed by Mr. Montgomery, that reportedly “would enable the advanced processing and exploitation of multi-media files.” Exh. 4 § 1.0. Blxware’s work under the contract terminated in mid-2009. Plaintiffs do not explain how Mr. Montgomery, while employed on such matters, acquired information germane to the NSA bulk metadata collection or PRISM programs

And (p. 7 footnote):

The discrepancies between Mr. Montgomery's prior statements and the claims now being made on his behalf perhaps should come as no surprise. In the eTreppid litigation, the court imposed sanctions against Mr. Montgomery for perjuring himself in a September 2007 declaration. See *Montgomery*, supra, 2010 WL 1416771, at *11, *16-18.

March 31, 2009: In deciding to grant sanctions requested by Montgomery's former attorney, Mike Flynn, in his attempt to collect fees owed, Magistrate Judge Valerie P. Cooke concludes Montgomery committed perjury and "Mr. Montgomery's September 2007 declaration contained untrue statements which he knew were untrue, and that this declaration was filed in bad faith and for the improper purposes of attempting to manipulate these proceedings, to gain a tactical advantage, to harass Mr. Flynn, his former counsel, and to subvert orders of this court." (pp. 1-2)

<https://www.scribd.com/document/275423222/Montgomery-v-eTreppid-985-ORDER-Granting-Sanctions-Re-Montgomery-Perjury-D-nev-3-06-Cv-00056-985>

The New York Times (Feb. 19, 2011) reports that in May 2009, the Air Force canceled its temporary contract with Blxware for not meeting its expectations:

https://www.nytimes.com/2011/02/20/us/politics/20data.html?_r=1

December 2009: Aram Roston of *Playboy Magazine*, formerly of NBC News, publishes “The Man Who Conned the Pentagon” about Dennis Montgomery for the January 2010 issue

<https://www.npr.org/templates/story/story.php?storyId=121667905?storyId=121667905>

November 18, 2010: Montgomery is deposed for his bankruptcy filing during which strong accusations are made. In response to some questions, Montgomery invokes his Fifth Amendment right to remain silent.

<https://www.scribd.com/document/270829649/Dennis-Montgomery-Nov-2010-Deposition-Transcript>

December 15, 2010: Montgomery appears in court to enter a plea of “not guilty” to the six indictments. His public defender states he is making payments toward restitution.

12/01/2010 | Arraignment Continued (10:00 AM) (Judicial Officers Wall, David, Loehrer, Sally)
12/01/2010, 12/15/2010

Minutes

12/01/2010 10:00 AM

- Mr. Schonfeld asked for another continuance in order for Defendant Montgomery to finalize representation. COURT SO ORDERED. SUMMONS (BOND) 12/15/2010 9:00 AM ARRAIGNMENT CONTINUED

12/15/2010 9:00 AM

- Mr. Schonfeld advised his firm could not confirm as counsel and requested Court appoint counsel for Deft. Colloquy regarding confirmation of the Public Defender's Office in this case and case C260373. Further colloquy on whether one of the two cases would be dismissed. Ms. Hoffman requested Court continue matter for Confirmation of Counsel. COURT ORDERED Mr. Schonfeld and his firm WITHDRAWN as counsel for Deft. in this case and in C260373. FURTHER, Ms. Hoffman's request DENIED; Public Defender APPOINTED as counsel for Deft. Montgomery in both cases. COURT NOTED if a conflict arises, counsel may bring it to Court's attention at that time. Ms. Hoffman further requested trial set in C260373 be continued further out. Mr. Schonfeld advised the District Attorney's Office will provide the Public Defender's Office with discovery, and he would provide anything else required. Mr. Schonfeld further noted Deft. was making payments on restitution for bad checks. COURT ORDERED 02/28/11 trial in C260373 STANDS, Court may be inclined to grant a continuance in either case if the Deputy Public Defender assigned to Deft. has a valid conflict. Ms. Hoffman noted she received a copy of the indictment and waived its reading. Deft. Montgomery ARRAIGNED, PLED NOT GUILTY, and WAIVED the 60-DAY RULE. COURT ORDERED matter SET for trial with case C260373. BOND 02/23/11 9:00 AM CALENDAR CALL 02/28/11 1:30 PM TRIAL BY JURY (COUNTS 1-6) CLERK'S NOTE: COURT ORDERED Clerk to prepare Minute Order in case C260373. lmv

<https://www.clarkcountycourts.us/Anonymous/CaseDetail.aspx?CaseID=8698813&HearingID=119552783&SingleViewMode=Minutes>

February 19, 2011: As referenced earlier, *The New York Times* publishes “Hiding Details of Dubious Deal, U.S. Invokes National Security” asserting that “Mr. Montgomery’s former lawyer, Michael Flynn — who now describes Mr. Montgomery as a “con man” — says he believes that the administration has been shutting off scrutiny of Mr. Montgomery’s business for fear of revealing that the government has been duped...Justice Department officials declined to discuss the government’s dealings with Mr. Montgomery, 57, who is in bankruptcy and living outside Palm Springs, Calif. Mr. Montgomery is about to go on trial in Las Vegas on unrelated charges of trying to pass \$1.8 million in bad checks at casinos, but he has not been charged with wrongdoing in the federal contracts, nor has the government tried to get back any of the money it paid. He and his current lawyer declined to comment.”

<https://www.nytimes.com/2011/02/20/us/politics/20data.html>

August 2013: Montgomery representative Tim Blixseth contacts the Maricopa County, AZ Sheriff’s Office (MCSO) relating Dennis Montgomery’s claims of a government super-computer, “The Hammer” allegedly used to spy on Americans and illegally harvest data

<https://www.phoenixnewtimes.com/news/joe-arpaios-posse-investigator-mike-zullos-secret-recordings-7823417>

September 2013: Montgomery contacts the MCSO and meets with investigator Mike Zullo and Det. Brian Mackiewicz at his home in Washington State, describing mass surveillance of Americans by “The Hammer” and purporting to possess evidence that approximately 153,000 Maricopa County residents were victims of government-instigated bank-account breaches. Montgomery also speaks directly with Maricopa County Sheriff Joseph Arpaio:

<https://www.thepostemail.com/2019/07/07/zullo-on-the-hammer-dennis-montgomery-and-changing-narratives/>

September 7, 2013: Radio host Carl Gallups suggests a new line of investigation by the Cold Case Posse:

<https://www.youtube.com/watch?v=1aXNwiWcVz0>

November 22, 2013: In sworn testimony in a case in which he is a defendant, Montgomery states he went to work for Opspring, launched by Michael Sandoval, on April 6, 2006, three months after leaving eTreppid, with a “multimillion dollar employment contract.”

He admits to establishing websites to allegedly expose “fraudulent and misleading business practices of Michael Sandoval and his company, Atigeo.”

4 9. Plaintiffs’ complaint and the declaration of Michael Sandoval allege that I
5 attempted to extort money from Michael prior to putting up the websites at issue in this
6 litigation. These accusations are completely false and without merit. I created the subject
7 websites to alert the public as to the fraudulent and misleading business practices of Michael
8 Sandoval and his company, Atigeo. In doing so, it was my hope to prevent further individuals
9 from being victimized or injured from these deceptive business practices. In no way was I
10 motivated by an alleged extortion scheme. In my opinion (and others), Michael has been
11 defrauding investors and business partners for the last seven years.
12

<https://www.scribd.com/document/271353176/Atigeo-37-Montgomery-Nov-13-Declaration-W-D-Wash-2-13-cv-01694-37>

Early 2014: Arpaio hires Montgomery as a confidential informant to provide the evidence he claims to have on residents’ bank-account intrusions.

November 3, 2014: As documented in court documents the following year, emails between Mackiewicz and Montgomery demonstrate Montgomery had not produced the claimed evidence despite having been paid to do so and that Mackiewicz believed Montgomery had “lied” to the MCSO.

I guess I will take a minute and respond to some of the issues at hand. Dennis you have no problem defending the work because you truly believe your the only person on the face of the earth that knows what your talking about. It is easy to hide behind, "we have a lack of understanding of software development and programs" but do you really think we would ever take your word as gospel? I will admit we did take your word as gospel for some time time but that time ended when you grossly misrepresented the work that you said was completed.

It would have not been such a big deal Dennis but Mike and I represented the fact the work was complete and it wasn't. Look I am not stupid you have lied to me several times over the past 12 months. I have caught you in you lies and chosen to move forward and look past the fact you lied. I always kept hope and believed when it came to your work product and your "STORY" you were always being truthful. The problem now is were do the lies end and the truth start. I am not even sure you know the answer to that Dennis.

From day one I thought we all had a common goal in mind when it came to this investigation. If your "STORY" was based on facts and the information you provided was all truthful Mike, I, and the Office was dedicated do anything in our powers LEGALLY to help bring your story forward and expose the TRUTH. I

November 7, 2014: At Arpaio’s request, former NSA program developers J. Kirk Wiebe, William Binney and Thomas Drake examine 47 hard drives Montgomery provided to the MCSO purported to contain

evidence of government surveillance. An email from Mackiewicz to Montgomery's attorney, Larry Klayman, copied to Zullo, Montgomery and one other party states, "After reviewing all the hard drives our experts concluded that Dennis Montgomery deliberately complied [sic] massive amounts of data on to these drives for the purpose of obfuscating the fact the data itself contained no evidence to support Dennis Montgomery's claims."

<https://www.scribd.com/document/271194289/Melendres-1166-D-Ariz-2-07-cv-02513-1166>

November 14, 2014: As Mackiewicz reported, Drake and Wiebe sign a report to Arpaio claiming the drives contain no useful data and further, label the data Montgomery provided "evidence of an outright and fraudulent con perpetrated on the government for personal gain and cover."

<https://www.scribd.com/document/289508561/PX-2531-2013-11-13-Drake-Wiebe-Letter-Re-Montgomery-Hard-Drives>

December 16, 2014: In an email chain, Zullo chastises Montgomery, who was using the screen name "David Webb," for turning over "worthless" information on hard drives to the MCSO as adjudged by former NSA program developers J. Kirk Wiebe and Thomas Drake.

<https://www.scribd.com/document/289321096/PX-2935-2014-12-16-Zullo-Mont-Mack-Email-Chain>

July 17, 2014: An email from then-Fox News reporter Carl Cameron to Dennis Montgomery (aka David Webb) reveal Montgomery did not provide the evidence he promised to Cameron to support his claims. Cameron blames Montgomery for Fox News's declination to run the story:

<https://www.thepostemail.com/2020/12/14/fox-news-considered-montgomery-story-but-passed/>

February 24, 2015: Represented by Atty. Larry Klayman, Montgomery sues former *New York Times* author James Risen for defamation as a result of his book, "Pay Any Price" which contains a chapter (Chapter 2) about Montgomery's work as a government contractor.

In the chapter, Risen indicates he contacted Montgomery for comment before going to press and that Montgomery had never produced evidence that his software worked.

<https://www.amazon.com/Pay-Any-Price-Greed-Endless/dp/0544570359>

Montgomery fails to produce a copy of the software or source code, defying a court order.

April 9, 2015: Zullo states that Montgomery violated the terms of his “free talk” with the Arizona Attorney General’s office (p. 25):

With your pending litigation in FL. You are aware that both Brian and I had met with the defendant that last time we were in DC. He has our business cards. It will only be a matter of time before we are contacted by his attorney. Also in light of your most recent attempt to offer testimony as a WB and the fact that we have a videotaped Free Talk agreement you made with the AZAG and you have breached that agreements as well, this is not something I am prepared to allow to move forward without the proper notifications made on our end under these agonizing circumstances.

Sixteen long months of ZERO s and just empty promises and lip service. Enough...

We are going to allow you one last attempt to honor your agreement with us and set a hard date in the very near future to complete the work as agreed. I will wait to hear from you or Larry . Remember this is going to be a make or break moment.

Time is of the essences Dennis...

Mike

April 20, 2015: Responding to an email from Montgomery's then-attorney Larry Klayman, Mike Zullo writes that "Mr. Montgomery's behavior and lack of performance flies in the face of his numerous promises pledging to complete the work.." (p. 23):

On Apr 20, 2015 7:10 PM, "Mike" <ltick@earthlink.net> wrote:

Larry,

This is now my second request asking for a date set for the completion of the work Dennis Montgomery has been promising for over 16 months.. Mr. Montgomery's behavior and lack of performance flies in the face of his numerous promises pledging to complete the work.. This is especially concerning given the face that Mr. Montgomery needs validation like a drowning man needs oxygen. His behavior simply erodes whatever thread of credibility he may have left. In fact as of this date, our experience dealing with Mr. Montgomery mirrors what has been written about him.. It is apparent to us that this is just a game of running the clock in the hope Montgomery can position himself as a "Whistle Blower" with some jurisdiction and with your help get out from under his obligation to the us. In our opinion Montgomery does not qualify under Federal Whistle Blower protections. A risky game....

I would like a response by close of business on Wednesday April 22nd, 2015. If we do not here from you or your client we will complete final reports, close the matter and make the appropriate notifications.

May 30, 2016: Federal Judge G. Murray Snow writes in an opinion that Montgomery committed “fraud” against the Maricopa County Sheriff's Office when he worked as a confidential informant:

20 359. There were many reasons Sheriff Arpaio would not have wanted the hard
21 drives and their fraudulent nature disclosed.

22 360. First, Mr. Montgomery committed a fraud on the MCSO. (Doc. 1417 at Tr.
23 1562-64; Doc. 1457 at Tr. 2455.) Having paid large sums of money to Montgomery for
24 his investigations, the MCSO was a victim of that fraud. Disclosure could therefore bring
25 embarrassment to Sheriff Arpaio and the MCSO.

26 361. Second, Sheriff Arpaio and Mr. Montgomery shared the same attorney and
27 had shared this attorney since at least November 2014.

28 362. Third, Sheriff Arpaio testified that the MCSO continued to engage Mr.

July 15, 2016: In *Montgomery v. Risen*, U.S. District Court Judge Rudolph Contreras rules in favor of Risen, stating, “Several discovery disputes arose throughout this period, and were considered by Magistrate Judge Jonathan Goodman. Of most relevance to the merits of Montgomery's claims is Defendants' request that Montgomery produce the software that is the subject of the Chapter. As explained in more detail below, after initially objecting to that request, Montgomery eventually claimed that he had turned over the only copy of his software to the FBI, along with a large volume of other computer drives and electronic information, in connection with an unrelated criminal investigation. Magistrate Judge Goodman ordered Montgomery on more than one occasion to produce the software and to coordinate with the

FBI in locating the software, using his self-described right of continued access to the software. *See* Aug. 22, 2015 Post-Disc. Hr'g Order ¶ 6, ECF No. 107; Oct. 19, 2015 Post-Disc. Hr'g Order ¶¶ 2–4, ECF No. 154. Montgomery filed objections to those orders with the district court. *See* Pl.'s Obj. to Portions of Magistrate Judge's Order of Aug. 22, 2015, ECF No. 125; Pl.'s Obj. to Magistrate Judge's Order of Oct. 19, 2015 & Req. to Stay, ECF No. 164. In addition, Defendants eventually filed a motion for spoliation sanctions, arguing that Montgomery's Amended Complaint should be dismissed, and Defendants should be awarded attorneys' fees, as a consequence of his failure to produce the software. *See* Defs.' Mem. of Law Supp. Mot. for Sanctions, ECF No. 166; Pl.'s Praecipe, ECF No. 170. On January 5, 2016, Magistrate Judge Goodman held a lengthy hearing on the sanctions motion. *See* Tr. of Misc. Mot. Hr'g ("Sanctions Hr'g Tr."), ECF No. 230.”

March 19, 2017, evening: Lt. Gen. Thomas McInerney (Ret) reads article on "The Hammer" published at *The American Report* on Dave Janda's "Operation Freedom" radio program "for the first time on radio or TV," according to Janda

<https://davejanda.com/?s=McInerney+March+19%2C+2017>

November 17, 2017: A three-judge appellate panel upholds Contreras's ruling in *Risen*, stating:

This is Montgomery's defamation case—he chose to bring it. To sustain it against a motion for summary judgment, he would have had to marshal sufficient evidence to create a triable issue for a jury as to each element of his claim. The district court held that he failed to take the basic steps necessary to do so. Critically, he produced virtually no evidence of the software's functionality to factually rebut Risen's statements that it never worked as Montgomery said it did.

Risen's reporting is, at its core, about how authorities at the highest levels of government fell for a "ruse," *id.* at 32: software that could never be verified. This lawsuit, too, has been defined by the software's persistent absence. That lacuna in the record dooms Montgomery's case. We affirm the district court's well-reasoned grant of summary judgment in favor of Defendants.

...

Montgomery intimates that, if the court deems the software to be material, he should not be held to his burden because the software is classified and so he cannot produce it. *See* Appellant's Br. 48-49. As an initial matter, there is reason to doubt that the software is, in fact, classified. *See Montgomery*, [197 F.Supp.3d at 243-44](#); *see also* J.A. 806 (excluding the software from a motion for a protective order filed by the United States in litigation in federal court in Nevada between Montgomery and his former employer). Even if the software is or was classified, Montgomery failed to take any steps to join issue on whether classification impermissibly obstructed his ability to satisfy his burden. Analysis of what record evidence suffices to avoid summary judgment is context-dependent, and we need not decide here what might have been enough. But it is clear that there were multiple avenues open to

Montgomery to try to make the required showing, either directly or indirectly. He pursued none.

<https://casetext.com/case/montgomery-v-risen-6>

October 20, 2020: Former Sheriff Joseph Arpaio releases a memoir, "Sheriff Joseph Arpaio: And American Legend" in which he writes extensively about Montgomery's work for the Maricopa County Sheriff's Office as a confidential informant:

“Montgomery claimed he was the architect who developed the software to ‘unlock’ logins and passwords to cell phones, bank records, email, and credit card accounts of millions of Americans. With Montgomery’s program (known as ‘Prism’ in intelligence circles), intelligence agencies had the ability, through a massive government supercomputer assembled in Ft. Washington, Maryland, to do the calculations necessary to apply 10 million password combinations per minute, thus using sheer brute force computing horsepower to unlock citizens’ private accounts at will. This massive supercomputer was known as ‘The Hammer’ and, allegedly, it is still in use today...”

“There were many times, to be perfectly frank, that he would string us along for as long as he could before giving us the information, then only to squeeze more money out of us. Zullo would frequently contact me, concerned by the self-described highly erratic computer genius that was Montgomery. Most law enforcement professionals know that paid informants are not always reliable. Montgomery would promise he was ‘days away’ from producing critical information, continuing to make sure his funding continued, but then would never deliver the goods. In my opinion, there were many indicators that Montgomery was potentially a con man, but there was enough truth in the evidence presented to Zullo and my detective Brian Mackiewicz that warranted us

to keep paying him. He always promised the next set of deliverables days away, and it always cost the county more money than we expected.

“I’ve never trusted Montgomery—and neither did Zullo, but we knew there was enough truth in his claims to continue to pursue the facts. There’s no doubt Montgomery had ‘some’ credible information to allege ‘The Hammer’ was used on my office and my personal cell phone. In addition to those bombshell claims, Montgomery stated to us that he had collected sensitive information on 153,000 Maricopa County residents on behalf of the NSA, such as recorded telephone calls, emails, bank logins and passwords, and credit card information. Once again, I had a duty to protect my county residents.”

<https://www.thepostemail.com/2020/11/11/why-is-the-hammer-resurfacing-now/>

2020: Montgomery establishes the website “Blxware.org,” accusing Edra Blixseth of having engaged "in illegal FBI/CIA/NSA domestic surveillance programs." Montgomery uses the site to purportedly raise money to “Expose the truth about Hammer and Scorecard,” a campaign which has reportedly garnered \$67,022 of a \$100,000 goal as of January 18, 2021.
