Re: Concern regarding the health
& welfare of Joseph R. Biden,
a resident of D.C.

CORRECTED- 2/11/22

Dear Director Newland,

In the past year I have had opportunity to observe the person referred to above indirectly and to form an opinion as to whether or not D.C. resident Joseph R. Biden, who works and resides in the District of Columbia, is a vulnerable disabled and elderly individual who is being emotionally and or otherwise abused and may be suffering at the hands of others.

Mr. Biden resides at 1600 Pennsylvania Avenue in D.C. and frequently appears to be confused, feeble, distressed, irritable, confrontational and incoherent. In the interest of this person, I request that you investigate the situation. It is my opinion that this person could be in a situation where he is being manipulated by others and may be unable to seek help on his own to remedy the situation.

Your job is to protect such individuals from such abuse. I suggest that he be examined and given cognitive tests as well as an interview by officials of the D.C. Department of Aging in order to determine the status of his health and welfare and whether he may require further intervention by the Department.

Respectfully,

Robert C. Laity, Supplicant
