Re: The Health and Welfare of
Joseph R. Biden, President
of the United States of America

Dear Secretary Becerra,

I have determined that it is currently prudent and advisable that I escalate this issue of concern to your attention. On February 10, 2022, concerned that President Biden may be a victim of elder abuse, I filed a letter of concern regarding the health and welfare of President Biden with Ms. Laura Newland, Director of the D.C. Department of Aging and Community living. The letter I sent Ms. Newland is attached for your reference.

The very next day, I was advised by Ms. Newland, to "contact the U.S. Department of Health and Human Services with my concerns". I was provided the contact information for Admiral Rachel L. Levine, (ASH). I then communicated with Admiral Levine on February 12, 2022. The correspondence to Admiral Levine is attached for your reference.

After two months of waiting for a response of some kind, I contacted Admiral Levine again on April 11, 2022. That correspondence is attached for your reference. To date I have received nothing in response to these grave concerns for the health, safety and welfare of President Biden. For that reason it has become necessary, given the overt evidence that the President is in mental decline and may be the victim of elder abuse, to escalate this matter to your level.
